

BUNDLECHEK

HOW IT WORKS?

After GlueChek™ finds a problem with the glue lines, or after FoldChek™ identifies manufacturers joint gap issues by analyzing pictures taken of every box at full production speeds, the BundleChek™ receives a signal and quickly diverts the bundle containing the issue to an alternate conveyor.

BENEFITS?

With the BundleChek™, manufacturers and customers alike can be sure that defective boxes are eliminated from the shipment. Differentiation from your competition by delivering more value equals more volume, higher price per box, and increased customer retention.

THE PERFECT BOX
