HOW IT WORKS?

FoldChek™ takes a picture of every manufacturer's gap. It analyzes the gap for width and skew. When a problem is found, FoldChek™ sounds an alarm, marks the defective box, and saves an image of the defect.

BENEFITS?

Customers can now be assured that their boxes are free from folding problems and gap variation. Box makers can accurately specify gap requirements to meet customer needs and ensure only perfectly folded boxes arrive at the customer's door.
