ACCESS YOUR ORDER SUMMARY ONLINE

Remotely connect to your system and access usage and quality data broken down by camera/ sensor per job. Production information is safely hosted in your ClearVision system, not on the cloud, and can be exported to Excel format.

HOW IT WORKS

Remotely collect data from your system using MeasurementChek™.

Users connect directly to BoxChek6 or 7 from their web browsers to obtain data on the number of boxes, system usage and defect rates by order. For more in-depth analysis, users can then select specific orders and download data per-box. The raw data can be easily exported into a .csv file format, which allows for personalization of quality reports.

As part of the extensive range of quality assurance products, MeasurementChek can gather data from any ClearVision camera system.

Box ID	Order No	Product	Order	Plant	Job	Material	Lot	Quantity	Material U	Rate	Rate	Rate	Rate	Rate	Rate	Rate	Rate	Rate	Rate	Rate	
211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712	211712

DOWNLOAD INDIVIDUAL BOX DATA

Exporting per-box details permits further analysis of production line performance for easy, personalized reporting.

BENEFITS

Quality managers in any production plant can expect the following benefits from using MeasurementChek:

- Enforce system utilization to operators
- Monitor your quality data any time, from any location
- Run statistics to evaluate the current process, or download per-box data to create your own custom reports
- Prove production quality to your customers by presenting them with data
- Data never leaves your ClearVision System, it is not hosted in the cloud
- Monitor different types of defects from one single source, including incorrect gluing, folding, print register, scoring, as well as problems with barcodes, or plastic windows, depending on the additional ClearVision systems installed.
