

TR500ME TAB TRIM REMOVAL SYSTEM

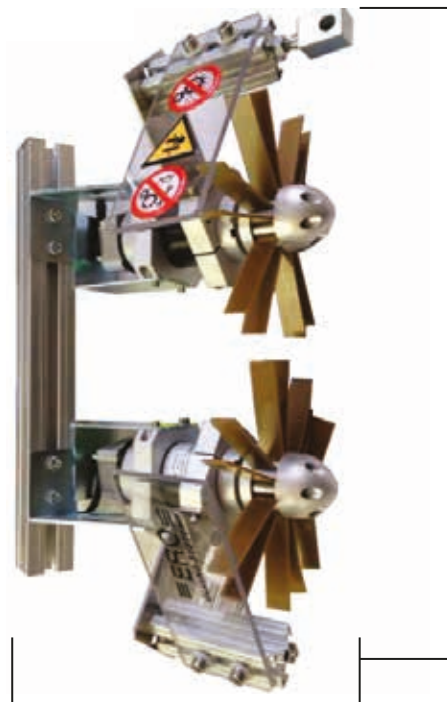

The TR500ME clears tab trim and scrap before it can reach the glue station. Two high speed electric motors drive top and bottom speed rotating blade sets. It is lightweight, compact and can easily be installed on most flexo-folder-gluer. Mounting bracket package included. The system automatically starts as product is detected in the machine and slows to idle speed when no product is being run.

Trim Removal System installed on a Flexo-Folder-Gluer

Key Features:

- Eliminate scrap issues such as false system starts and unglued boxes
- Two high-speed, 4000 rpm motors
- Long lasting high wear-laminated blade sets
